SUMMARY

Aspiring Network Engineer with hands-on experience in enterprise routing and switching. Completed CCNA and currently pursuing CCNP Enterprise. Built 4 enterprise-level labs in GNS3 covering OSPF, EIGRP, redistribution, filtering, and high availability. Self-taught in Cisco IOS with strong troubleshooting and documentation skills

PROJECTS

Enterprise Multi-Protocol Routing Lab — CCNP Level

github.com/arminisa/advanced-routing-lab

Designed 6-router topology with OSPF Multi-Area (Areas 0,1,2) and /22 route summarization

Configured EIGRP AS 10 with DUAL, ECMP load balancing, and bidirectional OSPF to EIGRP redistribution

Applied Route Filtering using Prefix-list and Route-map to selectively block 172.17.0.0/22

Enterprise Redundancy & High Availability Lab — CCNP Level

github.com/arminisa/hsrp-redundancy-lab

Configured HSRP with load balancing, priority tuning, and preempt across two distribution routers

Tuned STP, implemented EtherChannel (LACP/PAGP), Root Guard, BPDU Guard

Tested failover scenarios to verify seamless redundancy and quick convergence

Enterprise Switching & VLAN Lab — CCNA Level

github.com/arminisa/switching-vlan-lab

Configured multiple VLANs (IT, Sales, HR, Servers, Mgmt) with VTP Server/Client

Implemented Router-on-a-Stick, DHCP server per VLAN, and Port Security with sticky MAC

Enterprise Routing Lab — CCNA Level

github.com/arminisa/network-labs

Implemented OSPF Single-Area in hub-and-spoke, NAT/PAT, Extended ACLs, and default route propagation

SKILLS

Routing: OSPF Multi-Area, EIGRP DUAL, Route Redistribution, Filtering, NAT/PAT

Switching: VLANs, VTP, STP, EtherChannel, Port Security, ROAS

Tools: GNS3, Cisco IOS, Kali Linux, Git, GitHub, VS Code, Python beginner

EDUCATION

B.Sc. in Food Science & Engineering — Saba University, Urmia, Iran

CERTIFICATIONS

CCNA 200-301 — Completed | CCNP Enterprise (ENCOR 350-401) — In Progress
